Plateau Telecommunications Purchases Saron Technology, LLC

(Clovis, N.M.) ... Plateau Telecommunications, Incorporated announced today that it has signed an agreement purchasing Saron Technology, LLC.

Saron is a Clovis-based information technology (IT) services company supporting business customers in and around the area and has been in existence since 2013. In addition to purchasing Saron's assets, its eight employees will join Plateau, bringing expertise and experience to support business customers that choose Plateau for their IT support needs.

According to Plateau CEO David Robinson, "Plateau is always looking for ways to expand its business and increase value to its customers. One of those ways is by providing professional services - both managed and support - to take care of business customers' IT needs. Adding these services will complement Plateau's broadband offerings."

Formed in 1949 as Eastern New Mexico Rural Telephone Cooperative, Plateau provides advanced communications services including voice, internet and video to residents in all or parts of 18 eastern New Mexico counties and four in the Texas Panhandle. For additional information, visit www.plateautel.com.
